

Optical Fibre Optical Launch Spool - OTDR

Description

The UNIQ optical launch spool is locally produced in Melbourne Australia.

A robust spool is made with the help of high quality 3D printers

Optical fibre is wound to the required length and fitted locally.

This makes for a high quality launch cable to suit your needs with local support for future repairs and/or servicing.

Features

- Small size
- Light weight
- Supplied in handy carry case
- Local manufacture
- Local support
- Most common connector types available
