

Optical Fibre Underground Dome Closure

Description

Small underground dome closure suited for jointing of smaller cables in communication pits. Multiple cable entry ports allows the closure to easily accommodate up to 24 fibres allowing for repair work or splitting larger cables into multiple smaller cables. Heathshrink sealing for a long lasting and secure cable entry seal.

Features

- Splice trays for 24f (2 x 12f)
- Four cable entry ports
- One oval cable entry suits unbroken tubes
- All necessary accessories included
 - Heatshinks, transport tubes, splice protectors etc

Specifications
