

Optical Fibre Preterminated Cable Assemblies

Description

Uniq Fibre Connectivity manufactures a variety of preterminated cable assemblies to suit their customer's requirements. These assemblies allow for easy installations as they are simply plug and play.

Manufactured locally in Melbourne Australia we strive to offer the best value possible taking into consideration price and turn around time whilst maintaining the best of quality.

Allowing for the myriad options that customers demand we offer preterminated cable assemblies with a variety of options.

these include :

- Riser cables
- Loose Tube cables
- Multimode and Singlemode options
- LC, LC/APC, SC, SC/APC and ST options
- Multiple fibre counts
- Multiple breakout options
 - suit FOBOT installations (0.9mm terminations)
 - suit direct connection to active equipment (2mm terminations)

Please contact your distributor for more information and pricing.

For short run cable assemblies we use our smaller width cable drums. These make for easier handling and shipping compared to much larger plastic drums.

Designed and manufactured locally by us they are reusable and also 100% recyclable, meaning they are better for the environment than plastic alternatives.

Designed to suit targeted riser and loose tube cables the drums can handle up to 200m cable assembly runs with ease. The third flanged area gives protection to the inner preterminated end.
